

**FRAMEWORK FOR ANNUAL REPORT  
OF STATE CHILDREN'S HEALTH INSURANCE PLANS  
UNDER TITLE XXI OF THE SOCIAL SECURITY ACT**

**Preamble**

Section 2108(a) of the Act provides that the State must assess the operation of the State child health plan in each fiscal year, and report to the Secretary, by January 1 following the end of the fiscal year, on the results of the assessment. In addition, this section of the Act provides that the State must assess the progress made in reducing the number of uncovered, low-income children.

To assist states in complying with the statute, the National Academy for State Health Policy (NASHP), with funding from the David and Lucile Packard Foundation, has coordinated an effort with states to develop a framework for the Title XXI annual reports.

The framework is designed to:

Recognize the *diversity* of State approaches to SCHIP and allow States *flexibility* to highlight key accomplishments and progress of their SCHIP programs, **AND**

- Provide *consistency* across States in the structure, content, and format of the report, **AND**
- Build on data *already collected* by HCFA quarterly enrollment and expenditure reports, **AND**
- Enhance *accessibility* of information to stakeholders on the achievements under Title XXI.

**FRAMEWORK FOR ANNUAL REPORT  
OF STATE CHILDREN'S HEALTH INSURANCE PLANS  
UNDER TITLE XXI OF THE SOCIAL SECURITY ACT**

State/Territory: KANSAS  
(Name of State/Territory)

The following Annual Report is submitted in compliance with Title XXI of the Social Security Act (Section 2108(a)).

\_\_\_\_\_  
(Signature of Agency Head)

SCHIP Program Name (s) HealthWave

SCHIP Program Type         Medicaid SCHIP Expansion Only  
                                   X   Separate SCHIP Program Only  
                                      Combination of the above

Reporting Period **Federal Fiscal Year 2000 (10/1/99-9/30/00)**

## SECTION 1. DESCRIPTION OF PROGRAM CHANGES AND PROGRESS

---

*This sections has been designed to allow you to report on your SCHIP program's changes and progress during Federal fiscal year 2000 (September 30, 1999 to October 1, 2000).*

**1.1 Please explain changes your State has made in your SCHIP program since September 30, 1999 in the following areas and explain the reason(s) the changes were implemented.**

*Note: If no new policies or procedures have been implemented since September 30, 1999, please enter [NC] for no change. If you explored the possibility of changing/implementing a new or different policy or procedure but did not, please explain the reason(s) for that decision as well.*

- D. Program eligibility [NC]
- E. Enrollment process [NC]
- F. Presumptive eligibility [NC]
- G. Continuous eligibility [NC]
- H. Outreach/marketing campaigns [NC]
- I. Eligibility determination process [NC]
- J. Eligibility redetermination process

Follow-up phone calls have been instituted to those families who have not returned their review forms to offer assistance.

- K. Benefit structure [NC]
- L. Cost-sharing policies [NC]
- M. Crowd-out policies

Families who are covered by employer plans where the provider network does not exist in the State are considered uninsured and able to access HealthWave.

- N. Delivery system [NC]
- O. Coordination with other programs (especially private insurance and Medicaid) [NC]

P. Screen and enroll process [NC]

Q. Application

The Social Security number has been eliminated for adults. It is an optional field for children. An optional language field has been added to report the primary language spoken in the home.

R. Other [NC]

**1.2 Please report how much progress has been made during FFY 2000 in reducing the number of uncovered, low-income children.**

A. Please report the changes that have occurred to the number or rate of uninsured, low-income children in your State during FFY 2000. Describe the data source and method used to derive this information.

The only data on uninsured children we have on a consistent basis is the CPS data. The most current CPS data for Kansas, although not statistically significant, is for the three years 1997, 1998, and 1999. The number of uninsured children less than age 19 and with family incomes less than or equal to 200 % of the FPL is 52,000 +/- 11,600. This most recent figure is an increase from the CPS state-specific data of 42,000 +/- 10,800 for 1996, 1997, and 1998. However, the recent figure is a reduction from the baseline number from 1993, 1994, and 1995, of 60,000 +/- 12,300.

B. How many children have been enrolled in Medicaid as a result of SCHIP outreach activities and enrollment simplification? Describe the data source and method used to derive this information.

As of September 2000, Kansas had 22,701 children enrolled in Medicaid as a result of SCHIP outreach. This figure is derived by the state's contractor, MAXIMUS, who operates the centralized Clearinghouse applications processing function, and tracks submission of the simplified, joint, mail-in applications. Files from the state's automated eligibility system are matched with Clearinghouse records of applications returned to, and tracked by, the Clearinghouse. This match finds the number of children eligible in that month for Medicaid whose eligibility was determined from submission of a simplified application.

C. Please present any other evidence of progress toward reducing the number of uninsured, low-income children in your State.

We have no other evidence at the current time.

An outside evaluation being conducted by the Kansas Health Institute, in cooperation with the Department of Social and Rehabilitation Services (SRS) and other entities, over the next three years will give us additional information regarding this issue. One of the projects in the evaluation is to examine the impact of HealthWave on reducing the number of low-income uninsured children, explain the existence of low-income children who continue to be uninsured, and identify differences in health care access and health status between insured and uninsured low-income children.

- D. Has your State changed its baseline of uncovered, low-income children from the number reported in your March 2000 Evaluation?

  X   No, skip to 1.3

       Yes, what is the new baseline?

What are the data source(s) and methodology used to make this estimate?

What was the justification for adopting a different methodology?

What is the State's assessment of the reliability of the estimate? What are the limitations of the data or estimation methodology? (Please provide a numerical range or confidence intervals if available.)

Had your state not changed its baseline, how much progress would have been made in reducing the number of low-income, uninsured children?

**1.3 Complete Table 1.3 to show what progress has been made during FFY 2000 toward achieving your State's strategic objectives and performance goals (as specified in your State Plan).**

In Table 1.3, summarize your State's strategic objectives, performance goals, performance measures and progress towards meeting goals, as specified in your SCHIP State Plan. Be as specific and detailed as possible. Use additional pages as necessary. The table should be completed as follows:

- |           |   |
|-----------|---|
| Column 1: | List your State's strategic objectives for your SCHIP program, as specified in your State Plan.   |
| Column 2: | List the performance goals for each strategic objective.  |
| Column 3: | For each performance goal, indicate how performance is being measured, and progress towards meeting the goal. Specify data sources, methodology, and specific measurement approaches (e.g., numerator, denominator). Please attach additional narrative if necessary. |

*Note: If no new data are available or no new studies have been conducted since what was reported in the March 2000 Evaluation, please complete columns 1 and 2 and enter [NC] (for no change) in column 3.*

#### Additional Narrative Information on Strategic Objectives

##### Objective #1: Reduce the number of uninsured non-Medicaid eligible children under 19 years of age and below 200% FPL in the State of Kansas'

As of December 1, 2000, there were 19,148 children in HealthWave and an additional 25,758 children in Medicaid as a result of the HealthWave application process for a total of 44,906 children with health insurance coverage insured through the simplified mail-in application process. An accurate estimate of whether the total number of uninsured non-Medicaid eligible children below 200% FPL is decreasing and the reason for such change is not available. One limitation is that CPS data cannot distinguish between Medicaid eligible and noneligible. Data showing the number of children enrolled in HealthWave is the only information we have at this time to measure the program's effectiveness in this area.

An outside, three-year evaluation being conducted by the Kansas Health Institute should give us some additional information in this area. One of the projects within the evaluation is to examine the impact of HealthWave on reducing the number of low-income uninsured children in Kansas, explain any continuing presence of uninsured low-income children, and identify differences in health care access and health status between insured and uninsured low-income children.

##### Objective #3: Assure that the enrolled children with significant health needs have access to appropriate care.

As noted in the table above, encounter data needed to evaluate this objective is not fully available at this time. The State of Kansas has hired a Quality Assurance Manager. This manager's top priority is to evaluate encounter data. An outside evaluation is underway conducted by the Kansas Health Institute which should give us additional information regarding the experience of all children enrolled in HealthWave with regard to access to and appropriateness of care. This is designed to be a three-year evaluation beginning in the first quarter of CY 2000 so information will not be available until at least early in CY 2001.

##### Objective #4: Assure that the enrolled children receive high quality health care services.

Coverage began on January 1, 1999 and the health plans were exempt from CAHPS requirements for the first year due to implementation issues and the lack of choice among health plans for beneficiaries (i.e., there is only one health plan available in each region). HEDIS data was received from the managed care organizations in June 2000. Additional information will be gathered through the outside Kansas Health Institute evaluation discussed briefly in Objective 1 and 3.

Objective #5: Increase the percentage of enrolled children with regular preventive care.

EPSDT screens for State fiscal year 2000 (July 1, 1999 - June 30, 2000) were 56% and 53.81% for the two HealthWave physical health managed care organizations. The State believes there are outstanding claims and reporting issues which need to be resolved before these percentages will be truly reflective of what is occurring in the HealthWave program.

**1.4 If any performance goals have not been met, indicate the barriers or constraints to meeting them.**

See above notes to the table.

**1.5 Discuss your State's progress in addressing any specific issues that your state agreed to assess in your State plan that are not included as strategic objectives.**

[NC]

**1.6 Discuss future performance measurement activities, including a projection of when additional data are likely to be available.**

As has been mentioned earlier, a three-year evaluation of HealthWave being performed by the Kansas Health Institute is currently underway in cooperation with SRS and other entities. This evaluation is being funded through various grants including the Packard Foundation, U.S. Health Resources and Services Administration, Kansas Health Foundation, United Methodist Health Ministry Fund, U.S. Agency for Health Care Policy and Research (now the Agency for Healthcare Research and Quality), and other potential funders. Other entities involved in the evaluation are: the Kansas Department of Health and Environment; the University of Kansas Schools of Social Welfare and Nursing; the University of Kansas Medical Center; Kansas State University; and the Kansas Foundation for Medical Care. Various parts of this study have been discussed throughout this evaluation in response to various specific questions. In general this evaluation is designed to:

- C Examine the impact of HealthWave on reducing the number of low-income uninsured children in Kansas, explain any continuing presence of uninsured low-income children, and identify differences in health care access and health status between insured and uninsured low-income children;
- C Determine the impact of HealthWave on health status, quality of care, and utilization for low-income children in the program, and as compared to a group of Medicaid enrollees;
- C Evaluate how well the HealthWave program provides health services to particularly vulnerable children including urban African-Americans, Hispanic immigrants, children in poor, rural areas and children with mental health needs; and
- C Assess the effect of HealthWave on the health care market, particularly the traditional safety net providers that exist in rural and other disadvantaged areas of the state.

Data for the evaluation will be gathered through surveys, focus groups, agency administrative data and other secondary data such as vital statistics, hospital discharge data and the Kansas Health Insurance Information System. Since this is a three year evaluation, data should be available at various times beginning in CY 2001 and continuing through CY 2002.

**1.7 Please attach any studies, analyses or other documents addressing outreach, enrollment, access, quality, utilization, costs, satisfaction, or other aspects of your SCHIP program's performance. Please list attachments here.**

Attachments: Outreach reports, SCHIP Monthly Cost Report, monthly enrollment report, Quality Management plan for implementation on 7/1/01, eligibility denial code summary.

CAHPS - is only available as a hard copy. If you would like it, please let the State know and it will be sent.

## SECTION 2. AREAS OF SPECIAL INTEREST

---

*This section has been designed to allow you to address topics of current interest to stakeholders, including; states, federal officials, and child advocates.*

### **2.1 Family coverage:**

- E. If your State offers family coverage, please provide a brief narrative about requirements for participation in this program and how this program is coordinated with other program(s). Include in the narrative information about eligibility, enrollment and redetermination, cost sharing and crowd-out.

Family coverage is not offered in the HealthWave program.

- F. How many children and adults were ever enrolled in your SCHIP family coverage program during FFY 2000 (10/1/99 - 9/30/00)?

N/A

Number of adults \_\_\_\_\_

Number of children \_\_\_\_\_

- C. How do you monitor cost-effectiveness of family coverage?

N/A

### **2.2 Employer-sponsored insurance buy-in:**

- A. If your State has a buy-in program, please provide a brief narrative about requirements for participation in this program and how this program is coordinated with other SCHIP program(s).

Currently, there is no employer-sponsored insurance buy-in as a part of the HealthWave program.

- B. How many children and adults were ever enrolled in your SCHIP ESI buy-in program during FFY 2000?

N/A

Number of adults \_\_\_\_\_

Number of children \_\_\_\_\_

### **2.3 Crowd-out:**

- A. How do you define crowd-out in your SCHIP program?

Crowd out is defined as dropping employer-sponsored or private-pay insurance without cause during the 6-month period prior to receiving HealthWave coverage.

B. How do you monitor and measure whether crowd-out is occurring?

We have no definitive data on the extent of crowd-out. We do have some limited information on how many applications are denied due to the existence of insurance. However, this information may not give an accurate representation of the issue because of the information potential applicants are given regarding the requirement of children being uninsured for six months. Families who already have children covered by other insurance may not ever submit an application because they believe the child(ren) will not be eligible. We have no way at this time to discover the number of children whose parents drop other insurance and let their child remain uninsured for six months before applying. If the insurance ended at least six months before application, no information is collected about that insurance coverage and why it was discontinued. The limited denial data we have seems to indicate that families with children already covered by health insurance are not submitting HealthWave applications.

We have systems data for our Medical Program (MP) that gives us limited information regarding the number of applications denied because of existing insurance. MP cases include both SCHIP eligible and poverty-level-eligible Medicaid children. The simplified HealthWave application can be used to determine eligibility for either program. However, denial for existing health insurance would only apply to SCHIP eligibility determinations. The denial data is not restricted to the simplified HealthWave application and could include denials for children who applied through the eight page application used to apply for other assistance programs as well as medical coverage. Another limitation of this data is that the denial reason is an eligibility worker input field subject to error. Finally, the automated eligibility system only allows one reason code to be entered and there could be more than one reason for denial (e.g. health insurance and excess income). It is up to the worker to choose which denial code to put in so there may be some inconsistencies in the data.

C. What have been the results of your analyses? Please summarize and attach any available reports or other documentation.

For the original three-month period reported in the last annual report, July through September 1999, statewide MP denials due to existing health insurance averaged 4.0% of all denials. When narrowed down to applications processed in the Clearinghouse, which eliminates all but the simplified joint application, the average denial rate due to health insurances rose to 5.2% of all application denials. In this same period, the average number of monthly denials statewide was approximately 1,000 with an average of 399 denials at the Clearinghouse. The rates for the period of August 2000 through November 2000 were 4.5% statewide and 5.9% for the Clearinghouse, with a total average of statewide and Clearinghouse denials of 708 and 274, respectively. According to this data, the presence of preexisting health insurance coverage accounts for a small percentage of denials.

The SAS report that summarizes this data from the automated eligibility system is not available for attachment. A spreadsheet summary of this data, including denial reasons only applicable to HealthWave is attached.

- D. Which anti-crowd-out policies have been most effective in discouraging the substitution of public coverage for private coverage in your SCHIP program? Describe the data source and method used to derive this information.

There is only one crowd-out policy (no insurance in previous 6 months), and we have no other analysis of the policy, other than the review of denial reasons and limited questionnaire data.

## **2.4 Outreach:**

- A. What activities have you found most effective in reaching low-income, uninsured children? How have you measured effectiveness?

One of the most effective ways to do outreach is to be available when parents are ready to think about health insurance for their children. School involvement has been very successful. Kindergarten Round-ups, school enrollments, HealthWave flyers sent home in early January (during flu season) are very good times to connect with parents when they are thinking about health care needs. Outreach works with school nurses who help get the word to families throughout the year when a child may need glasses, hearing tests or some other type of treatment.

Scheduled times for families to complete an application are also very effective. These application assistance events sometimes take place in health departments during WIC pickup days or schools during special events. This year Marketing began notifying the local media whenever possible about application assistance events for inclusion in their community calendars. This resulted in an increased number of families who completed an application or came and picked one up.

The business community is another very effective partner in helping reach parents and encouraging them to enroll their children. Many employers open their workforce and places of business to presentations and application assistance. Employers are very aware of the cost of absent workers due to children's illness. They also understand that it makes good business sense to offer their employees a benefit that will have such a significant impact on their lives. Within the business community, small employers, the nursing home sector, restaurants, retail and temporary agencies all have lower paid employees. Each sector has been helpful in giving workers time to talk to an outreach representative and encouraging them to enroll.

Outreach measures effectiveness by the number of people who complete an application and the number who take one. Application numbers are checked daily to monitor the effectiveness of particular types of activities. Enrollment numbers are reviewed monthly to help indicate which areas may need additional activities. Finally, quality reviews are done on every outreach coordinator each week with a phone survey to one of the organizations they met with the prior week. Outreach coordinators are also given in person quality checks at least once a month.

- B. Have any of the outreach activities been more successful in reaching certain populations (e.g., minorities, immigrants, and children living in rural areas)? How have you measured effectiveness?

Outreach has found the most effective method of reaching these segments of the populations is to become involved in their communities. For instance, it's important to have a representative who looks like or speaks the same language as a minority audience. An outreach representative who only speaks English could not have been successful in stopping along the side of the road in western Kansas and going into the fields to ask workers to come and fill out applications during their breaks. A representative who only spoke English would not have been well received going into a café filled with Spanish speakers and asking immigrants if their children had health insurance and helping them complete the enrollment form on the spot.

It is important to the African American community to have representatives who were also African American join them in the parades, go to their faith communities and speak to their congregations or be available after the services for assistance in completing an application.

When there isn't an outreach coordinator who is a part of the population being targeted, efforts are focused on the social services agencies who help minorities or immigrants secure other services. These agencies already have a well established relationship with the segment of the community they serve. If a person already helping with other social needs recommends HealthWave the acceptance rate is much higher. Outreach in this scenario works with the agency to help them understand the benefits of HealthWave for their customers and remain available to assist with explanations, applications or other needs specific to the community. This also builds the relationship between the Outreach coordinator and the specific minority community.

Before Outreach went to the Native American tribes, coordinators learned about tribal expectations, how they should dress and the decorum expected by the tribe. Establishing close ties with the tribes had to do with lots of repetition, being available for numerous events and offering the Indian Health Services a clear understanding of HealthWave benefits. Outreach knew they were successful when letters were sent to every Native American child in specific counties. Names and addresses were provided by the tribal council. Outreach has been invited to powwows when no other vendor was allowed to attend because the tribes have come to trust HealthWave and know Outreach will only send representatives that honor their customs.

The rural communities in Kansas have very high enrollment rates based on the target population estimates established when HealthWave began. Rural areas respond very well to the fact that an outreach worker is willing to come to their community and work with them. Within three months of the program's start, children and teens were enrolled in every Kansas county even though most of them are very rural and their targeted number of children was often between 9 and 70. Outreach workers are stationed throughout the state and were hired from their communities which helps potential families believe in the program.

Effectiveness in reaching minority and immigrant populations is judged by the head count at events, responses to quality checks and the applications received from a scheduled application assistance. The

rural communities are easier to measure using the standard tools of reviewing the applications and enrollments from each county every month.

C. Which methods best reached which populations? How have you measured effectiveness?

All segments of the community respond well to the outreach efforts at the schools and the WIC pick-up days. Outreach always works to network with social service organizations, businesses and vendors at any health fair and they often become a source for future invitations. This is true for rural areas as well as minority populations. It can't be overstated that outreach must become immersed in whatever community they are targeting.

Outreach has spent a significant amount of time during 2000 to help staff become culturally competent. Most of the staff went to cultural competency training conducted by national speakers. Focus areas were the African American population, Native Americans, Vietnamese, Refugees and the Latino population. One staff member completed national certification as a Spanish interpreter.

The best methods for outreach continue to be the one-on-one contacts with families who are ready to discuss health insurance with an Outreach Coordinator who is well trained in program knowledge and how to work with the each segment of their territory's population. Marketing efforts help make the community aware of the program and create an expectation for families to come and receive information and an application.

HealthWave measures the effectiveness of outreach through a variety of MAXSTAR tracking reports. The number of applications received each month is compared to the established targets. Second, the number of children and teens enrolled in each county for both HealthWave and Medicaid are compared to the targets. Third, outreach coordinators submit the number of their events and the total number of people who attended a presentation, informational booth, meeting or cold calls in their community. Finally, Outreach listens to what they hear about HealthWave and how well it's being accepted in the community.

## 2.5 Retention:

A. What steps are your State taking to ensure that eligible children stay enrolled in Medicaid and SCHIP?

See below check marks. In addition, we are manually readding persons to the eligibility rosters even if reenrollment materials are returned after the monthly cut-off date, as long as materials are received prior to the first of the next month.

B. What special measures are being taken to reenroll children in SCHIP who disenroll, but are still eligible?

- ☒ Follow-up by caseworkers/outreach workers
- ☒ Renewal reminder notices to all families
- ☐ Targeted mailing to selected populations, specify population \_\_\_\_\_
- ☐ Information campaigns

- X   Simplification of reenrollment process, please describe: A simple, one page, reenrollment application is mailed to families.
- X   Surveys or focus groups with disenrollees to learn more about reasons for disenrollment, please describe: A limited phone questionnaire was distributed to persons who disenrolled from the HealthWave program. The targeted persons were those persons who did not return their reenrollment application.
- Other, please explain\_\_\_\_\_

C. Are the same measures being used in Medicaid as well? If not, please describe the differences.

Yes.

D. Which measures have you found to be most effective at ensuring that eligible children stay enrolled?

Direct phone calls to consumers appear to be most effective.

E. What do you know about insurance coverage of those who disenroll or do not reenroll in SCHIP (e.g., how many obtain other public or private coverage, how many remain uninsured?) Describe the data source and method used to derive this information.

Information from a limited questionnaire gathered in September 2000 found that 33% of respondents stated that obtaining other insurance was their primary reason for disenrollment in HealthWave.

## **2.6 Coordination between SCHIP and Medicaid:**

A. Do you use common application and redetermination procedures (e.g., the same verification and interview requirements) for Medicaid and SCHIP? Please explain.

Yes, common simplified mail-in application and redetermination procedures apply to both programs if the applicant is applying for medical coverage only. If other services administered by the department are sought, i.e., food stamps or child care subsidies, then the applicant submits a longer application.

B. Explain how children are transferred between Medicaid and SCHIP when a child's eligibility status changes.

Since the same automated system is used to determine eligibility for both programs, transfer between Medicaid and SCHIP when the child's status changes is automatic.

C. Are the same delivery systems (including provider networks) used in Medicaid and SCHIP? Please explain.

As of September 2000, the same delivery systems were not used in Medicaid and SCHIP. Kansas' SCHIP program is required by state law to be a separate, capitated managed care only, health insurance program. Since our Medicaid program is a combination of fee-for-service, primary care case management, waiver programs, and capitated managed care, we are unable to fully utilize the same delivery systems for both types of beneficiaries.

These requirements, however, have not lessened the state's and department's interest in integrating the programs for the majority of eligible families, and especially for the 25% of HealthWave-eligible families with children in both programs. The state is pursuing a revised contract to provide equivalent delivery systems, including provider networks, for poverty-level and 1931 Medicaid eligible families and for those with HealthWave coverage. The new contracts should take effect in July 2001.

## **2.7 Cost Sharing:**

- A. Has your State undertaken any assessment of the effects of premiums/enrollment fees on participation in SCHIP? If so, what have you found?

An assessment of potential cost sharing effects was made before the beginning of the SCHIP program as part of program design, but no follow-up assessment has been made. The initial assessment found that as many as one-third of potential enrollees might choose not to participate if cost-sharing were imposed. The state has not done a full study regarding the effect of premiums on program participation and we only have anecdotal information at this point. Our limited anecdotal information seems to indicate widespread support by families for the cost sharing concept. There seems to be a general feeling that cost sharing lessens the association of HealthWave with "public programs" or "welfare" and helps families feel as if they are making a contribution to their children's coverage. To our knowledge we have had few complaints regarding the premium responsibility other than non-premium paying families complaining that they do not get to pay a premium.

In the limited questionnaire mentioned before, only 7% of respondents stated that not wanting to pay a premium was the primary reason for disenrollment in the program.

- B. Has your State undertaken any assessment of the effects of cost-sharing on utilization of health service under SCHIP? If so, what have you found?

Due to the non-fee-for-service delivery system for the majority of services (transplants, dental costs >\$1,500, antihemophiliac drugs, and vaccine costs being the exceptions), the state has no claims data to analyze regarding utilization and will be dependent upon the MCOs for this information. As more encounter data is received, and as the Quality Assurance Manager designs and implements assessments, information on this subject will be available.

## **2.8 Assessment and Monitoring of Quality of Care:**

- A. What information is currently available on the quality of care received by SCHIP enrollees? Please summarize results.

Since quality standards were not required in a stand-alone SCHIP program, the quality component of HealthWave was not fully developed in the last year. The State of Kansas has hired a Quality Assurance Manager to develop this program.

- B. What processes are you using to monitor and assess quality of care received by SCHIP enrollees, particularly with respect to well-baby care, well-child care, immunizations, mental health, substance abuse counseling and treatment and dental and vision care?

The State of Kansas is collecting HEDIS measures on all of the above benefits except for vision care. Encounter data is used to report immunizations for use in quality studies and for reimbursement of vaccine costs to the VFC program.

- C. What plans does your SCHIP program have for future monitoring/assessment of quality of care received by SCHIP enrollees? When will data be available?

See the attached Quality Management plan.

### SECTION 3. **SUCCESSIONS AND BARRIERS**

---

*This section has been designed to allow you to report on successes in program design, planning, and implementation of your State plan, to identify barriers to program development and implementation, and to describe your approach to overcoming these barriers.*

#### **3.1 Please highlight successes and barriers you encountered during FFY 2000 in the following areas. Please report the approaches used to overcome barriers. Be as detailed and specific as possible.**

*Note: If there is nothing to highlight as a success or barrier, Please enter [NA] for not applicable.*

##### **A. Eligibility**

The current barriers that we are able to identify are ones that are placed on the program by federal law due to the program being a stand-alone SCHIP program. Specifically, the provisions relating to state employees not being eligible, and the 6-month crowd-out waiting period. The Medicaid barrier to increased enrollment is the Child Support Enforcement referral requirement.

A local challenge is with our State law which prohibits use of a fee-for-service delivery system, except for the most limited of services. The Kansas state statute mandates capitated managed care statewide. Due to the capitated mandate it is impossible at this time to offer up to 3 months prior coverage as is available in the Medicaid program.

##### **B. Outreach**

The State of Kansas in cooperation with our outreach contractor MAXIMUS and our RWJ partners are currently trying to find the 'hard to reach' uninsured. The population in the Western and Southeast corridor of the state is rural-based and widely-disbursed which presents challenges to find those families who have uninsured children. Families with language barriers or lack of access to telephones are included in this targeted population.

##### **C. Enrollment [NA]**

##### **D. Retention/disenrollment [NA]**

##### **E. Benefit structure [NA]**

##### **F. Cost-sharing [NA]**

##### **G. Delivery system [NA]**

##### **H. Coordination with other programs [NA]**

##### **I. Crowd-out [NA]**

##### **J. Other [NA]**

## SECTION 4. PROGRAM FINANCING

*This section has been designed to collect program costs and anticipated expenditures.*

**4.1 Please complete Table 4.1 to provide your budget for FFY 2000, your current fiscal year budget, and FFY 2002 projected budget. Please describe in narrative any details of your planned use of funds.**

*Note: Federal Fiscal Year 2000 starts 10/1/99 and ends 9/30/00).*

	Federal Fiscal Year 2000 costs	Federal Fiscal Year 2001	Federal Fiscal Year 2002
<b>Benefit Costs</b>			
Insurance payments			
Managed care	20,840,793.42	30,227,333.00	37,493,271.00

<b>TOTAL PROGRAM COSTS</b>	<b>27,197,193.39</b>	<b>35,568,051.00</b>	<b>41,843,450.00</b>

\*Note: Administrative costs are stated on a state fiscal year basis (July 1 - June 30) for all periods.

Clearinghouse (contractor) costs are based upon the state's contract with MAXIMUS. This contract includes application processing, enrollment, and outreach. Figures in the "Outreach/marketing" cell are dollars not

included in the Clearinghouse contract, including funding for the Robert Wood Johnson targeted outreach grant program.

The Clearinghouse processes more than Title XXI applications, and the outreach performed by Clearinghouse staff reaches both Title XIX and Title XXI eligibles. Administrative costs are allocated between Title XXI funding, Title XIX funding, and for years 2000 and 2001, TANF 1931 “delinking” funding. The appropriate federal match rate for each type of funding were used in calculating the “Federal share” cells in this table.

**4.2 Please identify the total State expenditures for family coverage during Federal fiscal year 2000.**

N/A - family coverage is not offered in the HealthWave program.

**4.3 What were the non-Federal sources of funds spent on your CHIP program during FFY 2000?**

- ☒ State appropriations
- ☐ County/local funds
- ☐ Employer contributions
- ☒ Foundation grants
- ☐ Private donations (such as United Way, sponsorship)
- ☒ Other (specify) Tobacco settlement funds

**A. Do you anticipate any changes in the sources of the non-Federal share of plan expenditures.**

No.

## SECTION 5: SCHIP PROGRAM AT-A-GLANCE

*This section has been designed to give the reader of your annual report some context and a quick glimpse of your SCHIP program.*

**5.1 To provide a summary at-a-glance of your SCHIP program characteristics, please provide the following information.** If you do not have a particular policy in-place and would like to comment why, please do. (Please report on initial application process/rules)

<b>Table 5.1</b>	Medicaid Expansion SCHIP program	Separate SCHIP program
Program Name	N/A	HealthWave
Provides presumptive eligibility for children	<input type="checkbox"/> No <input type="checkbox"/> Yes, for whom and how long?	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes, for whom and how long?
Provides retroactive eligibility	<input type="checkbox"/> No <input type="checkbox"/> Yes, for whom and how long?	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes, for whom and how long?
Makes eligibility determination	<input type="checkbox"/> State Medicaid eligibility staff <input type="checkbox"/> Contractor <input type="checkbox"/> Community-based organizations <input type="checkbox"/> Insurance agents <input type="checkbox"/> MCO staff <input type="checkbox"/> Other (specify) _____	<input checked="" type="checkbox"/> State Medicaid eligibility staff <input checked="" type="checkbox"/> Contractor <input type="checkbox"/> Community-based organizations <input type="checkbox"/> Insurance agents <input type="checkbox"/> MCO staff <input type="checkbox"/> Other (specify) _____
Average length of stay on program	Specify months _____	Specify months <u>12</u>
Has joint application for Medicaid and SCHIP	<input type="checkbox"/> No <input type="checkbox"/> Yes	<input type="checkbox"/> No <input checked="" type="checkbox"/> Yes
Has a mail-in application	<input type="checkbox"/> No <input type="checkbox"/> Yes	<input type="checkbox"/> No <input checked="" type="checkbox"/> Yes
Can apply for program over phone	<input type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes
Can apply for program over internet	<input type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No (expect to implement this soon, but not currently available) <input type="checkbox"/> Yes
Requires face-to-face interview during initial application	<input type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes

Table 5.1	Medicaid Expansion SCHIP program	Separate SCHIP program
Requires child to be uninsured for a minimum amount of time prior to enrollment	<input type="checkbox"/> No <input type="checkbox"/> Yes, specify number of months _____ What exemptions do you provide?	<input type="checkbox"/> No <input checked="" type="checkbox"/> Yes, specify number of months <u>6</u> What exemptions do you provide? <i>Loss of job, coverage was dropped by someone other than a custodial parent, coverage was not accessible because of distance to providers</i>
Provides period of continuous coverage regardless of income changes	<input type="checkbox"/> No <input type="checkbox"/> Yes, specify number of months _____ Explain circumstances when a child would lose eligibility during the time period	<input type="checkbox"/> No <input checked="" type="checkbox"/> Yes, specify number of months <u>12</u> Explain circumstances when a child would lose eligibility during the time period: <i>move out of state, death, incarceration, becomes Medicaid eligible because of placement in foster care, found eligible for Medicaid HCBS services or SSI eligible</i>
Imposes premiums or enrollment fees  <i>See note below table.</i>	<input type="checkbox"/> No <input type="checkbox"/> Yes, how much? _____ Who Can Pay? <input type="checkbox"/> Employer <input type="checkbox"/> Family <input type="checkbox"/> Absent parent <input type="checkbox"/> Private donations/sponsorship <input type="checkbox"/> Other (specify) _____	<input type="checkbox"/> No <input checked="" type="checkbox"/> Yes, how much? <u>\$10 per family per month for income between 151% and 175% of FPL, \$15 per family per month for income between 176% and 200% of FPL</u> Who Can Pay? <input checked="" type="checkbox"/> Employer <input checked="" type="checkbox"/> Family <input checked="" type="checkbox"/> Absent parent <input checked="" type="checkbox"/> Private donations/sponsorship <input type="checkbox"/> Other (specify) _____
Imposes copayments or coinsurance	<input type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes
Provides preprinted redetermination process	<input type="checkbox"/> No <input type="checkbox"/> Yes, we send out form to family with their information precompleted and: <input type="checkbox"/> ask for a signed confirmation that information is still correct <input type="checkbox"/> do not request response unless income or other circumstances have changed	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes, we send out form to family with their information and: <input type="checkbox"/> ask for a signed confirmation that information is still correct <input type="checkbox"/> do not request response unless income or other circumstances have changed

\*Families with incomes between 151% and 175% FPL pay a monthly premium of \$10. For families with incomes between 176% and 200% FPL the monthly premium is \$15. These are family premiums and do not vary based on how many children in the family are covered. Upon enrollment, families are allowed to choose whether they wish to pay monthly, quarterly or annually. Families receive a monthly statement indicating the amount currently due, the amount previously paid and (if applicable) the past due amount. The statement comes with a detachable coupon on the bottom and a postage paid return envelope. If they are behind on payments, families receive additional notices encouraging them to become current and advising them of the consequences of not being current at the time of renewal. Children are not disenrolled for failure to pay premiums during the 12-month continuous eligibility period. However, all required premiums must be paid before a child will be allowed to reenroll for the next eligibility period (assuming they are determined to be eligible at renewal). There is no lock-out period for reenrollment as long as any past due premiums are paid.

**5.2 Please explain how the redetermination process differs from the initial application process.**

There is basically no difference between the questions required on the initial and redetermination applications.

## SECTION 6: INCOME ELIGIBILITY

---

*This section is designed to capture income eligibility information for your SCHIP program.*

- 6.1 As of September 30, 2000, what was the income standard or threshold, as a percentage of the Federal poverty level, for countable income for each group?** If the threshold varies by the child's age (or date of birth), then report each threshold for each age group separately. Please report the threshold after application of income disregards.

Title XIX Child Poverty-related Groups or  
Section 1931-whichever category is higher

150 % of FPL for children under age 1  
133 % of FPL for children aged 1 through 5  
100 % of FPL for children aged 6 through 20

Medicaid SCHIP Expansion

N/A % of FPL for children aged \_\_\_\_\_  
\_\_\_\_ % of FPL for children aged \_\_\_\_\_  
\_\_\_\_ % of FPL for children aged \_\_\_\_\_

State-Designed SCHIP Program

200 % of FPL for children aged less than 19, and  
not eligible for Medicaid  
\_\_\_\_ % of FPL for children aged \_\_\_\_\_  
\_\_\_\_ % of FPL for children aged \_\_\_\_\_

- 6.2 As of September 30, 2000, what types and amounts of disregards and deductions does each program use to arrive at total countable income?** Please indicate the amount of disregard or deduction used when determining eligibility for each program. If not applicable, enter [NA]. See attached table.

Do rules differ for applicants and recipients (or between initial enrollment and redetermination)?

\_\_\_\_ Yes     X No

If yes, please report rules for applicants (initial enrollment).

<b>Table 6.2</b>			
	Title XIX Child Poverty-related Groups	Medicaid SCHIP Expansion	State-designed SCHIP Program
Earnings	\$200 per wage earner	\$	\$200 per wage earner
Self-employment expenses	25% of gross income or actual income producing costs	\$	25% of gross income or actual income producing costs
Alimony payments Received	\$0	\$	\$0
Paid	\$0	\$	\$0
Child support payments Received	\$0	\$	\$0
Paid	\$0	\$	\$0
Child care expenses	\$0 (included in wage earner deduction)	\$	\$0 (included in wage earner deduction)
Medical care expenses	\$0	\$	\$0
Other types of disregards/deductions (specify)	None	\$	None

**6.3 For each program, do you use an asset test?**

Title XIX Poverty-related Groups        X   No      \_\_\_\_ Yes, specify countable or allowable level of asset test \_\_\_\_

Medicaid SCHIP Expansion program        N/A   No      \_\_\_\_ Yes, specify countable or allowable level of asset test \_\_\_\_

State-Designed SCHIP program        X   No      \_\_\_\_ Yes, specify countable or allowable level of asset test \_\_\_\_

Other SCHIP program   N/A        \_\_\_\_ No      \_\_\_\_ Yes, specify countable or allowable level of asset test \_\_\_\_

**6.4 Have any of the eligibility rules changed since September 30, 2000?**    \_\_\_\_ Yes        X   No

## SECTION 7: FUTURE PROGRAM CHANGES

---

*This section has been designed to allow you to share recent or anticipated changes in your SCHIP program.*

**7.1 What changes have you made or are planning to make in your SCHIP program during FFY 2001(10/1/00 through 9/30/01)? Please comment on why the changes are planned.**

- B. Family coverage [NC]
- C. Employer sponsored insurance buy-in [NC]
- D. 1115 waiver [NC]
- E. Eligibility including presumptive and continuous eligibility [NC]
- F. Outreach [NC]
- G. Enrollment/redetermination process [NC]
- H. Contracting

We have issued an RFP to integrate the Title XIX and Title XXI programs to the extent that is possible by law when one program is a Medicaid entitlement program and the other is a program limited by funding from a block grant. The State of Kansas plans to be able to offer a choice to consumers between two Managed Care Organizations for physical health coverage. The mental health and dental benefits will be offered through an Administrative Service Organization. The benefits will remain equivalent between the two programs.

- I. Other [NC]

<b>Table 1.3</b>		
(1) Strategic Objectives (as specified in Title XXI State Plan and listed in your March Evaluation)	(2) Performance Goals for each Strategic Objective	(3) Performance Measures and Progress (Specify data sources, methodology, time period, etc.)
<b>OBJECTIVES RELATED TO REDUCING THE NUMBER OF UNINSURED CHILDREN</b>		
Reduce the number of uninsured non-Medicaid eligible children under 19 years of age and below 200% FPL in the State of Kansas	By December 31, 2000, at least 40,000 previously uninsured non-Medicaid eligible children will be enrolled in the SCHIP program. Another 10,000 children per year will be enrolled in 2001.	<p>Data Sources: Administrative data and Current Population Survey (CPS) data</p> <p>Methodology: Count number of children enrolled in HealthWave as of dates.</p> <p>Progress Summary: As of September 30, 2000 there were 17,990 children enrolled in HealthWave. The original estimate given in the state plan did not account for the number of Medicaid eligible, but not enrolled, children discovered as a result of the SCHIP/Medicaid joint application process. As of the same time period 22,701 additional children were determined to be Medicaid eligible, as a result of SCHIP outreach, for a total of 40,691.</p>
<b>OBJECTIVES RELATED TO SCHIP ENROLLMENT</b>		
		<p>Data Sources:</p> <p>Methodology:</p> <p>Progress Summary:</p>

Table 1.3		
OBJECTIVES RELATED TO INCREASING MEDICAID ENROLLMENT		
		<p>Data Sources:</p> <p>Methodology:</p> <p>Progress Summary:</p>
OBJECTIVES RELATED TO INCREASING ACCESS TO CARE (USUAL SOURCE OF CARE, UNMET NEED)		

**Table 1.3**

Assure that the enrolled children with significant health needs have access to appropriate care.	Reduce the number of cases of hospitalization due to asthma among the enrolled children.	<p>Data Sources: Administrative data for hospital stay and services.</p> <p>Methodology: Encounter data with asthma CPT codes for CY 1999 was used. Beneficiaries with the diagnosis of asthma at least one time during the calendar year were determined. Of these beneficiaries, the number hospitalized with the diagnosis of asthma was found.</p> <p>Progress Summary: For CY 1999, there were 428 children enrolled whose primary diagnosis was asthma, and 83 of them (19.4%) were hospitalized. When CY 2000 data is available, it will be used for comparison purposes.</p>																		
Assure that the enrolled children receive high quality health care services.	By December 31, 2000, at least 90% of SCHIP enrollees will report overall satisfaction with their health care.	<p>Data Sources: Consumer Assessment of Health Plans Study (CAHPS) survey results.</p> <p>Methodology: Standard CAHPS methodology.</p> <p>Numerator: MCO 1 = 303, MCO 2 = 773</p> <p>Denominator: MCO 1 = 937, MCO 2 = 1050</p> <p>Progress Summary: CAHPS survey information is available for the 1999 reporting period.</p> <table> <tr> <th></th><th><u>MCO 1</u></th><th><u>MCO 2</u></th></tr> <tr> <td>Getting needed care</td><td>89%</td><td>83%</td></tr> <tr> <td>Getting care quickly</td><td>73%</td><td>60%</td></tr> <tr> <td>How well Drs communicate</td><td>88%</td><td>71%</td></tr> <tr> <td>Courteous &amp; helpful office staff</td><td>88%</td><td>74%</td></tr> <tr> <td>Customer service</td><td>81%</td><td>71%</td></tr> </table>		<u>MCO 1</u>	<u>MCO 2</u>	Getting needed care	89%	83%	Getting care quickly	73%	60%	How well Drs communicate	88%	71%	Courteous & helpful office staff	88%	74%	Customer service	81%	71%
	<u>MCO 1</u>	<u>MCO 2</u>																		
Getting needed care	89%	83%																		
Getting care quickly	73%	60%																		
How well Drs communicate	88%	71%																		
Courteous & helpful office staff	88%	74%																		
Customer service	81%	71%																		

**Table 1.3****OBJECTIVES RELATED TO USE OF PREVENTIVE CARE (IMMUNIZATIONS, WELL-CHILD CARE)**

<p>Increase the percentage of enrolled children with regular preventive care.</p>	<p>By December 31, 1999, at least 75% of enrolled children through 2 years of age will receive one or more age-appropriate immunizations.</p> <p>By December 31, 1999, at least 80% of enrolled children will receive one or more Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services.</p>	<p>Data Sources: Health Plan Encounter Data and Information Set (HEDIS) data.</p> <p>Methodology:</p> <p>Progress Summary: As of June 13, 2000, some HEDIS information was available. However, since most eligibles did not have 12 months of eligibility in MCO 2 (began operation in May 1999), results for HEDIS are zeros. MCO 1 did not have a large enough denominator for HEDIS. MCO 1 reported zero as their HEDIS measure.</p> <p>The State of Kansas also receives the encounters on immunizations. These encounters are based on CPT codes which are used to generate reports and invoice for reimbursement purposes to the VFC program. Kansas declared the HealthWave children State Vaccine eligible.</p> <p>Data Sources: Administrative report for EPSDT screens. Encounters for immunizations.</p> <p>Methodology: Health plans will use claims data and beneficiary information to calculate the number of exams required compared to the number completed by age group.</p> <p>Numerator: EPSDT exams reported</p> <p>Denominator: Total exams needed per periodicity schedule</p> <p>Progress Summary: Information is available for the period ending September 30, 2000. See comments following chart (Obj. #5) for updated information.</p>

MAXIMUS

**HealthWave****Marketing Report****January through October 2000**

The HealthWave advertising and marketing plan utilizes several techniques to inform and educate families with children. Each campaign targets limited income families with children without health insurance. We used radio, outdoor, newspaper, television, inserts/direct mail, theater slides, bus signs and premium items.

The objective of our advertising campaign is simple - get the attention of families eligible for HealthWave. If they are influenced by our advertising, they will call us on the toll free telephone number we promote in the ads. Our marketing plan recognizes that to be effective we must reach families in numerous ways. Program credibility, customer service and consumer education remain primary objectives for 2000.

Implementation of our media campaign, a close relationship with the media, corporate sponsorships, support from local community agencies and consistent follow up by the outreach staff help establish an identity for HealthWave.

Here's a summary of the different mediums used January through October.

**Radio**

**KANSAS HEALTHWAVE PRESENTATION EVENT - March 2000**

DATE	ORGANIZATION	LOCATION	TYPE OF EVENT	TIME	LANGUAGE
------	--------------	----------	---------------	------	----------

In January, we designed a radio campaign for Wichita . Most of the stations provided a PSA schedule that ran during the same time period. Throughout the life of this project, we have utilized public service announcements as well as news interviews and news stories to create additional awareness. Since January of this year, 45 HealthWave interviews, news stories and news broadcasts have aired throughout Kansas. Radio remains our strongest advertising and marketing medium.

**Outdoor**

Two outdoor campaigns helped reach our target audience this year.. In February and March, we purchased billboard locations in Wichita, Fort Scott, Hutchinson, Great Bend, Columbus, Coffeyville, Parsons and Pittsburg. This campaign utilized 12 X 24 poster panels in all locations.

**Page Two****Newspaper/Newsletters/Inserts/Flyers**

Since January, more than 55 ads, articles and news stories and have been printed about HealthWave. Water bill inserts have been distributed in Salina, Lawrence, Garden City, Liberal, Dodge City and Topeka. Over 125 smaller towns throughout rural Kansas agreed to mail out a HealthWave insert in their employee payroll envelopes. Professional organizations all across Kansas stepped in with additional support. Groups such as the Kansas National Education Association, Kansas Association of Counties, Kansas Hospital Association, Wichita/Topeka Chamber of Commerce, Kansas Association of School Boards and more, all agreed to print HealthWave articles in their newsletter. In addition, HealthWave information has been added to the web site of several organizations.

**KANSAS HEALTHWAVE PRESENTATION EVENT - March 2000**

DATE	ORGANIZATION	LOCATION	TYPE OF EVENT	TIME	LANGUAGE
------	--------------	----------	---------------	------	----------

**Television**

Recently, we added cable television and cable access channels to our media directory. With the cable directory, we are able to utilize cable television for promoting local events. First Lady, Linda Graves and Topeka Mayor, Joan Wagnon, both agreed to produce a 30-second PSA supporting HealthWave. More than 30 television news stories, news interviews and HealthWave PSA schedules have aired since January. Television news stories and family interviews will remain an important part of our media mix.

**Theater Slides**

Movie goes in Topeka and Wichita will see a HealthWave message into the year 2001. A total of 30 movie screens in Wichita and Topeka will show a HealthWave slide every 5 minutes prior to the feature movie. This rotation lasts for 20 to 30 minutes 7 days a week.

**Bus Signs**

Eight mini-buses were used in Wichita. We utilized exterior bus signs in Wichita through July of this year.

**Premiums**

Since January, more than 30,000 premium items have been used to help promote HealthWave. Our colorful HealthWave pen represents more than half the total number of premiums distributed throughout Kansas. Other premium items used include, band-aids, a full color poster, magnets, pencils, buttons, and HealthWave stickers.
